Proposals – Existing

SU2 Delivering Sustainable Transport

Development with lower levels of parking provision may be acceptable in locations that are highly accessible by walking, cycling and public transport, including Tamworth's network of centres.

Appendix C

The developer will normally have to provide fully for the parking demand generated on or near the site of the development, particularly when new buildings are proposed.

This requirement may not however be possible or desirable where redevelopment, refurbishment or conversions are proposed within the town centre or conservation areas when conservation and transportation policies need to be taken into account and the availability of public parking facilities assessed. In these circumstances the standards should be used in a positive and flexible manner as an aid to development.

In central areas with good public transport links users may require less parking.

Where such development proposals do not make provision to the relevant parking standard then negotiations can be entered into to see if further provision could be achieved or to reach a suitable compromise where public safety will not be prejudiced.

It is recognised, however, that the parking requirements are but part of the overall assessment of the planning merits of the proposal and the outcome can be a balance between all these considerations.
