The contents of this report relate only to the matters which have come to our attention, which we believe need to be reported to you as part of our audit planning process. It is not a comprehensive record of all the relevant matters, which may be subject to change, and in particular we cannot be held responsible to you for reporting all of the risks which may affect the Authority or all weaknesses in your internal controls. This report has been prepared solely for your benefit and should not be quoted in whole or in part without our prior written consent. We do not accept any responsibility for any loss occasioned to any third party acting, or refraining from acting on the basis of the content of this report, as this report was not prepared for, nor intended for, any other purpose.

Grant Thornton UK LLP is a limited liability partnership registered in England and Wales: No.OC307742. Registered office: 30 Finsbury Square, London, EC2A 1AG. A list of members is available from our registered office. Grant Thornton UK LLP is authorised and regulated by the Financial Conduct Authority. Grant Thornton UK LLP is a member firm of Grant Thornton International Ltd (GTIL). GTIL and the member firms are not a worldwide partnership. Services are delivered by the member firms. GTIL and its member firms are not agents of, and do not obligate, one another and are not liable for one another's acts or omissions.

Introduction

Your key Grant Thornton team members are:

This paper provides the Audit and Governance Committee with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes:

- a summary of emerging national issues and developments that may be relevant to you as a local authority; and
- includes a number of challenge questions in respect of these emerging issues which the Committee may wish to consider (these are a tool to use, if helpful, rather than formal questions requiring responses for audit purposes)

Members of the Audit and Governance Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications www.grantthornton.co.uk ..

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact either your Engagement Lead or Engagement Manager.

Progress at July 2021

Financial Statements Audit

We undertook our initial planning for the 2020/21 audit in January 2021, and interim audit in February and March. We began our work on your draft financial statements in June.

In March we issued a detailed audit plan, setting out our proposed approach to the audit of the Authority's 2020/21 financial statements.

The Accounts and Audit (Amendment) Regulations 2021 push back the date by which principal authorities need to publish their draft financial statements to the first working day of August. In 2020 this date was pushed back to 31 August. The date by which authorities are required to publish audited financial statements is 30 September. In 2020 this date was pushed back to 30 November.

As at 28th July 2021, we have partially completed the audit of your accounts. There were some delays as a result of unforeseen circumstances which have hampered the progress of the audit. Our audit work is still ongoing and the most significant items are;

- receipt and review of supporting evidence for the following samples; journals testing, additions testing, creditors testing, Covid grants expenditure testing, expenditure completeness testing, capital commitments testing, housing benefit expenditure testing;
- receipt and review of modules 2 and 5 for housing benefit expenditure;
- receipt and review of supporting evidence to support the valuers assumptions in relation to their valuation of land and buildings, council dwellings and investment properties;
- review of source data provided to support the business rates appeals provision;
- receipt and review of responses to our queries on operating leases;
- receipt and review of the pension fund auditor's letter;
- Engagement Lead and Audit Manager quality reviews;
- receipt of management's signed representation letter; and
- review of the final, approved set of financial statements

We plan to complete our onsite work by 30 July and to issue our Audit Findings Report by 6 August 2021. We note that the pensions auditor has informed us that we will not receive their response to our questions until 31 August (at the earliest). We will not be able to complete our audit until this is received.

Value for Money

The new Code of Audit Practice (the "Code") came into force on 1 April 2020 for audit years 2020/21 and onwards. The most significant change under the new Code is the introduction of an Auditor's Annual Report, containing a commentary on arrangements to secure value for money and any associated recommendations, if required.

The new approach is more complex, more involved and is planned to make more impact.

Under the 2020 Code of Audit Practice, for relevant authorities other than local NHS bodies auditors are required to issue our Auditor's Annual Report no later than 30 September or, where this is not possible, issue an audit letter setting out the reasons for delay.

As a result of the ongoing pandemic, and the impact it has had on both preparers and auditors of accounts to complete their work as quickly as would normally be expected, the National Audit Office has updated its guidance to auditors to allow us to postpone completion of our work on arrangements to secure value for money and focus our resources firstly on the delivery of our opinions on the financial statements. This is intended to help ensure as many as possible could be issued in line with national timetables and legislation. The extended deadline is now no more than three months after the date of the opinion on the financial statements.

Please see page 7 for further details.

Sector Update

Authorities continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit committee members, as well as any accounting and regulatory updates.

The new approach to Value for Money

The nature of value for money work

Section 20 and 21 of the Local Audit and Accountability Act 2014 (the Act), require auditors to be satisfied that the body “has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources”. The auditor’s work on VFM arrangements is undertaken in accordance with the Code and its supporting statutory guidance. The Comptroller and Auditor General has determined through the 2020 Code and guidance that the key output from local audit work in respect of VFM arrangements is the commentary as reported in the Auditor’s Annual Report. It is therefore not a VFM arrangements ‘conclusion’ or an ‘opinion’ in the same sense as the opinion on the financial statements themselves. The Act and the Code require auditors to consider whether the body has put in place ‘proper arrangements’ for securing VFM. The arrangements that fall within the scope of ‘proper arrangements’ are set out in ‘AGN 03 Auditors’ work on VFM arrangements’, which is issued by the NAO. When reporting on these arrangements, the Code requires auditors to structure their commentary on arrangements under three specified reporting criteria:

Financial sustainability

How the body plans and manages its resources to ensure it can continue to deliver its services, including how the body:

- ensures that it identifies all the significant financial pressures that are relevant to its short and medium-term plans and builds these into them;
- plans to bridge its funding gaps and identifies achievable savings;
- plans finances to support the sustainable delivery of services in accordance with strategic and statutory priorities;

- ensures that its financial plan is consistent with other plans such as workforce, capital, investment, and other operational planning which may include working with other local public bodies as part of a wider system; and
- identifies and manages risks to financial resilience, e.g. unplanned changes in demand, including challenge of the assumptions underlying its plans.

Governance

How the body ensures that it makes informed decisions and properly manages its risks, including how the body:

- monitors and assesses risk and how the body gains assurance over the effective operation of internal controls, including arrangements to prevent and detect fraud;
- approaches and carries out its annual budget setting process;
- ensures effective processes and systems are in place to ensure budgetary control; to communicate relevant, accurate and timely management information (including non-financial information where appropriate); supports its statutory financial reporting requirements; and ensures corrective action is taken where needed;
- ensures it makes properly informed decisions, supported by appropriate evidence and allowing for challenge and transparency. This includes arrangements for effective challenge from those charged with governance/audit committee; and
- monitors and ensures appropriate standards, such as meeting legislative/regulatory requirements and standards in terms of officer or member behaviour (such as gifts and hospitality or declarations/conflicts of interests).

The new approach to Value for Money

Improving economy, efficiency and effectiveness

How the body uses information about its costs and performance to improve the way it manages and delivers its services, including:

- how financial and performance information has been used to assess performance to identify areas for improvement;
- how the body evaluates the services it provides to assess performance and identify areas for improvement;
- how the body ensures it delivers its role within significant partnerships, engages with stakeholders it has identified, monitors performance against expectations, and ensures action is taken where necessary to improve; and where the body commissions or procures services, how the body ensures that this is done in accordance with relevant legislation, professional standards and internal policies, and how the body assesses whether it is realising the expected benefits.

Page 10

VFM arrangements commentary and recommendations

The new approach to Value for Money

The table below details what will be reported in the Auditor's Annual Report:

Section of report	Content
Commentary on arrangements	An explanation of the VFM work that has been undertaken during the year, including the risk assessment and any further risk-based work. It will also highlight any significant weaknesses that have been identified and brought to the body's attention. The commentary will allow auditors to better reflect local context and draw attention to emerging or developing issues which may not represent significant weaknesses, but which may nevertheless require attention from the body itself.
Recommendations	Where an auditor concludes that there is a significant weakness in a body's arrangements, they report this to the body and support it with a recommendation for improvement.
Progress in implementing recommendations	Where an auditor has reported significant weaknesses in arrangements in the previous year, the auditor should follow up recommendations issued previously and include their view as to whether the recommendations have been implemented satisfactorily.
Use of additional powers	Where an auditor uses additional powers, such as making statutory recommendations or issuing a public interest report, this should be reported in the auditor's annual report.
Opinion on the financial statements	The auditor's annual report also needs to summarise the results of the auditor's work on the financial statements.

The table below details the three types of recommendations that auditors can make. Auditors may make recommendations at any time during the year.

Type of recommendation	Definition
Statutory recommendation	Where auditors make written recommendations to the body under Section 24 and Schedule 7 of the Local Audit and Accountability Act 2014. A recommendation of this type requires the body to discuss and respond publicly to the report.
Key recommendation	Where auditors identify significant weaknesses in a body's arrangements for securing value for money, they have to make recommendations setting out the actions that the body should take to address them
Improvement recommendation	Where auditors do not identify a significant weakness in the body's arrangements, but still wish to make recommendations about how the body's arrangements can be improved

Revised auditing standard: Auditing Accounting Estimates and Related Disclosures

In the period December 2018 to January 2020 the Financial Reporting Council issued a number of updated International Auditing Standards (ISAs (UK)) which are effective for audits of financial statements for periods beginning on or after 15 December 2019. ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures* includes significant enhancements in respect of the audit risk assessment process for accounting estimates.

Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do Audit and Governance Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

Additional information that will be required for our March 2021 audits

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2021 in all areas summarised above for all material accounting estimates that are included in the financial statements.

Based on our knowledge of the Authority we have identified the following material accounting estimates for which this is likely to apply:

- Valuations of land and buildings, council dwellings and investment properties
- Depreciation
- Year end provisions and accruals
- Credit loss and impairment allowances
- Valuation of defined benefit net pension fund liabilities
- Fair value estimates

The Authority's Information systems

In respect of the Authority's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

We are aware that the Authority uses management experts in deriving some of its more complex estimates, e.g. asset valuations and pensions liabilities. However, it is important to note that the use of management experts does not diminish the responsibilities of management and those charged with governance to ensure that:

- All accounting estimates and related disclosures included in the financial statements have been prepared in accordance with the requirements of the financial reporting framework, and are materially accurate;
- There are adequate controls in place at the Authority (and where applicable its service provider or management expert) over the models, assumptions and source data used in the preparation of accounting estimates.

Estimation uncertainty

Under ISA (UK) 540 (Revised December 2018) we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management addresses this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

Where there is material estimation uncertainty, we would expect the financial statement disclosures to include:

- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;
- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainty is unresolved.

Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:

[https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-\(UK\)-540_Revised-December-2018_final.pdf](https://www.frc.org.uk/getattachment/0fa69c03-49ec-49ae-a8c9-cc7a2b65382a/ISA-(UK)-540_Revised-December-2018_final.pdf)

Insight into accounting for grants in local government financial statements – Grant Thornton

The government has provided a range of financial support packages throughout the COVID-19 pandemic.

We have issued a brief bulletin aimed at helping local government bodies identify the key things they should consider when determining the accounting treatment for these grants in their financial statements for 2020/21.

Page 14

There are no changes to the accounting treatment for grants as required by the CIPFA Code of Practice on Local Authority Accounting. What has changed, is the extent of additional funding to support the cost of services, to offset other income losses along with grant packages to be paid out to support local business. Local authorities need to consider the nature and terms of the various COVID-19 measures in order to determine whether there is income and expenditure to be recognised in the Comprehensive Income and Expenditure Statement in 2020/21.

The report highlights the factors to consider, including:

- Where the funding is to be transferred to other parties, is the authority acting as principal or as agent?
- Are there grant conditions outstanding?
- Is the grant a specific or non-specific grant?

Our bulletin provides you with links to further information on the various support packages and summarises features that may be relevant to your judgements as you determine the appropriate accounting treatment.

Local authorities need to demonstrate their judgements on the accounting treatment to be reasonable and soundly based and, where these have a significant effect on the accounts, to ensure they include sufficient disclosures to meet the requirements of IAS 1:122.

Please ask your audit manager for the full report:

What can be learned from Public Interest Reports? – Grant Thornton

2020 will be remembered as a tumultuous year in local government, with the pandemic creating unprecedented pressure on the sector. It also saw the appearance of two Public Interest Reports (PIRs), followed by another in January this year – the first to be issued in the sector since 2016. PIR's can be issued by local auditors if there are significant concerns around council activity, such as major failings in finance and governance.

The recent PIRs have made headlines because, up to this point, very few have ever been issued. But, as our latest report “Lessons from recent Public Interest Reports” explores, all three illustrate some of the fundamental issues facing the wider sector and provide a lesson for all local authorities around: weaknesses in financial management; governance and scrutiny practices; and council culture and leadership; which, when combined, can provide fertile ground for the kind of significant issues we might see in a PIR.

The COVID-19 pandemic highlighted four essential factors we probably always knew about local government, have often said, but which are now much better evidenced:

- 1) Local government has provided fantastic support to its communities in working with the NHS and other partners to deal with the multifaceted challenges of the pandemic.
- 2) Britain's long centralised approach to government has been exposed to some degree in terms of its agility to tailor pandemic responses to regional and local bodies. This is recognised by the current government who continue to pursue the options for devolution of powers to local bodies. Track and Trace delivered centrally has not been as successful as anticipated and, according to government figures, local interventions have had more impact.

- 3) Years of reduced funding from central government have exposed the underlying flaws in the local authority business model, with too much reliance on generating additional income.
- 4) Not all authorities exercise appropriate care with public money; not all authorities exercise appropriate governance; and not all authorities have the capability of managing risk, both short and long term. Optimism bias has been baked into too many councils' medium-term plans.

The PIRs at Nottingham City Council (August 2020), the London Borough of Croydon (October 2020), and Northampton Borough Council (January 2021) are clear illustrations of some of the local government issues identified above. The audit reports are comprehensive and wide-ranging and a lesson for all local authorities. Local authorities have a variety of different governance models. These range from elected mayor to the cabinet and a scrutiny system approach, while others have moved back to committee systems. Arguments can be made both for and against all of these models. However, in the recent PIR cases, and for many other local authorities, it's less about the system of governance and more about how it operates, who operates it and how willing they are to accept scrutiny and challenge.

There are a number of lessons to be learned from the recent PIR reports and these can be broken down into three key areas which are explored further in our report:

- 1) The context of local government in a COVID-19 world
- 2) Governance, scrutiny, and culture
- 3) Local authority leadership.

The full report is available here:

[Lessons from recent Public Interest Reports | Grant Thornton](#)

Annual Transparency Report – Grant Thornton

As auditors of several listed entities as well as nearly one hundred major local audits, we are required as a firm to publish an annual transparency report.

The report contains a variety of information which we believe is helpful to audit committees as well as wider stakeholders. The Financial Reporting Council (FRC) in their thematic review of transparency reporting noted that they are keen to see more Audit Committee Chairs actively engaging and challenging their auditors on audit quality based on the information produced in Transparency reports on a regular basis. We agree with the FRC and are keen to share our transparency report and discuss audit quality with you more widely.

The transparency report provides details of our:

- Leadership and governance structures
- Principle risks and Key Performance Indicators
- Quality, risk management and internal control structure
- Independence and ethics processes
- People and culture
- Compliance with the Audit Firm Governance code and EU Audit directive requirements

We have made significant developments in the year as part of our Local Audit Investment Plan to improve our audit quality. We welcome an opportunity to discuss these developments and our transparency report should you wish.

The full report is available here:

[Transparency report 2020 \(grantthornton.co.uk\)](https://www.grantthornton.co.uk/transparency-report-2020)

Local government finance in the pandemic – National Audit Office

The National Audit Office (NAO) report, published in March, notes “The COVID-19 pandemic has been an unprecedented public health and economic emergency. Local authorities in England have made a major contribution to the national response to the pandemic, working to protect local communities and businesses, while continuing to deliver existing services. The pandemic has in turn placed significant pressure on local authorities’ finances, which in many cases were already under strain going into the pandemic.”

The NAO report examines if the Department’s approach to local government finance in the COVID-19 pandemic enabled it to assess and fund the costs of new services which local authorities have been asked to deliver. It also examines whether the Department fulfilled its responsibilities in securing financial sustainability across the sector.

The NAO report concludes “Steps taken by the government, led by the Department, have supported local authorities in the COVID-19 pandemic response. The Department’s successful monthly collection of data and continued intensive engagement with the sector provided a good evidence base to underpin the financial and other support provided by government. Action by the Department and wider government to support the sector has averted system-wide financial failure at a very challenging time and means that the Department has managed the most severe risks to value for money in the short term.

However, the financial position of local government remains a cause for concern. Many authorities will be relying on reserves to balance their 2020-21 year-end budgets. Despite continuing support into 2021-22 the outlook for next year is uncertain. Many authorities are setting budgets for 2021-22 in which they have limited confidence, and which are balanced through cuts to service budgets and the use of reserves.”

The NAO report found that “the combined impact on spending and non-tax income in 2020-21 is £9.7bn – equivalent to 17.6% of revenue expenditure. So far the government has announced £9.1bn of financial support, leaving a deficit of £605m.”

The full report can be obtained from the NAO website:

[Local government finance in the pandemic - National Audit Office \(NAO\) Report](#)

Local authority Covid-19 pressures – MHCLG

Outturn figures from the Ministry for Housing, Communities and Local Government (MHCLG) show that local authorities in England reported additional cost pressures of £12.8bn relating to Covid-19 in 2020-21. Overall, local authorities spent £7.2bn responding to the pandemic last year, with the largest share of additional expenditure going on adult social care services at £3.2bn.

Additional expenditure due to COVID-19 by class and service area (£ millions) (2020-21)

	Shire District	Shire County	Unitary Authority	Metropolitan District	London Borough	Total
Adult Social Care – total	0.473	1,254.880	848.656	663.404	413.842	3,181.254
Children's social care - total (excluding SEND)	0.000	94.933	131.127	89.799	62.987	378.846
Housing - total (including homelessness services) excluding HRA	63.129	5.254	74.949	42.281	112.971	298.584
Environmental and regulatory services - total	33.564	68.097	67.512	66.704	63.556	299.433
Finance & corporate services - total	48.222	53.445	83.984	76.923	78.284	340.858
All other service areas not listed in rows above	184.550	634.578	584.924	564.737	395.137	2,363.926

CIPFA Financial Resilience Index

The Chartered Institute of Public Finance & Accountancy's (CIPFA) Financial Resilience Index is a comparative tool designed to provide analysis on resilience and risk and support good financial management.

CIPFA note "CIPFA's Financial Resilience Index is a comparative analytical tool that may be used by Chief Financial Officers to support good financial management, providing a common understanding within a council of their financial position.

The Index shows a council's position on a range of measures associated with financial risk. The selection of indicators has been informed by extensive financial resilience work undertaken by CIPFA over the past five years, public consultation and technical stakeholder engagement.

Section 151 officers may also use the index in their annual report to the council setting out the proposed budget for the year and medium-term financial strategy.

While the impact of COVID-19 resulted in a delay to the publication of the index, it is still able to provide a comprehensive pre-COVID baseline, illustrating the financial resilience of authorities as they entered the pandemic."

CIPFA found that "there was a real-terms reduction of £800m in the level of reserves in 2020 compared with the previous year. At the end of March 2020 council reserves levels stood at £24.6bn, around 3% lower than £25.4bn recorded at the same period in 2019."

CIPFA note "The index is made up of a set of indicators. These indicators take publicly available data and compare similar authorities across a range of factors. There is no single overall indicator of financial risk, so the index instead highlights areas where additional scrutiny should take place in order to provide additional assurance. This additional scrutiny should be accompanied by a narrative to place the indicator into context."

The Financial Resilience tool is available on the CIPFA website below:

<https://www.cipfa.org/services/financial-resilience-index-2021?crdm=0>

Good practice in annual reporting – National Audit Office

The National Audit Office (NAO) state that the guide, launched in February, “Sets out our good practice principles for good annual reporting and provides illustrative examples taken from public sector organisations who are leading the way in this area.

The guide draws on examples of good practice from within each of the six sections of an Annual Report:

- Strategy
- Risk
- Operations
- Governance
- Measures of success
- Financial performance

The NAO also state that the guide “provides further examples where bodies have made their context more understandable to the reader through use of graphics and clear language and signposting.”

However, The NAO observe “Done well, reporting in the public sector enables the public and Parliament to understand – with ease and confidence – an organisation’s strategy and the risks it faces, how much taxpayers’ money has been spent and on what, and what has been achieved as a result.”

Further, the NAO note “The significant impacts of the pandemic emerged in the UK in mid-March 2020. This means that, for many organisations, the reporting impact will be greater in 2020-21 than in the prior year. Transparent annual reporting will help stakeholders understand the impact of COVID-19 on an organisation’s strategy, plans and operational and financial performance.”

Government response to Redmond review – MHCLG

Government has published an update on the Ministry of Housing, Communities & Local Government response to Sir Tony Redmond’s independent review into the effectiveness of external audit and transparency of financial reporting in local authorities.

The MHCLG press release states “The Audit, Reporting and Governance Authority (ARGA) – the new regulator being established to replace the Financial Reporting Council (FRC) – will be strengthened with new powers over local government audit, protecting public funds and ensuring councils are best serving taxpayers.

The new regulator, which will contain a standalone local audit unit, will bring all regulatory functions into one place, to better coordinate a new, simplified local audit framework.

ARGA will continue to act as regulator and carry out audit quality reviews as the FRC does now. It will now also provide annual reports on the state of local audit and take over responsibility for the updated Code of Local Audit Practice – the guidelines councils are required to follow.

The government has confirmed that the Public Sector Audit Appointments (PSAA) will continue as the appointing body for local audit, in charge of procurement and contract management for local government auditors.

In the immediate term, MHCLG will set up and chair a Liaison Committee, which will comprise senior stakeholders across the sector that will oversee the governance of the new audit arrangements and ensure they are operating effectively.”

The press release goes on to state the “measures finalise the government’s response to Sir Tony Redmond’s independent review into local audit, carried out last year.

The government has already announced £15 million to support councils with additional costs in audit fees, and recently consulted on the distribution of this funding. Government is also consulting on improving flexibility on audit fee setting and has extended the deadline for when councils must publish their audited accounts.

The press release can be found here:

2019/20 audited accounts – Public Sector Audit Appointments

In December 2020 Public Sector Audit Appointments (PSAA) published figures relating to the audit of 2019/20 local authority financial statements.

PSAA report “Audit arrangements in local councils, police, fire and other local government bodies are continuing to exhibit signs of stress and difficulty. In the latest audit round, focusing on 2019/20 financial statements and value for money arrangements, fewer than 50% of bodies’ audits were completed by the revised target of 30 November.

Page 22
Figures compiled by PSAA, the organisation responsible for appointing auditors to 478 local bodies, reveal that 55% (265) of audit opinions were not issued by 30 November. This is a further deterioration on 2018/19 audits when 43% of opinions (210 out of 486) were delayed beyond the then target timetable of 31 July.”

By 30 November, Grant Thornton had signed 113/208 audits (a 55% completion rate), meaning that only 45% of audit opinions were not signed by 30 November, compared to the 55% all firms average.

PSAA go on to note “This year’s timetable has been deliberately eased by Ministers in recognition of the underlying pressures on the audit process and the significant added complications arising from the Covid-19 pandemic. The pandemic has posed practical challenges for bodies in producing accounts and working papers, and for auditors to carry out their testing. Both sets of staff have had to work remotely throughout the period, and the second national lockdown came at a critical point in the cycle.

Questions and concerns about the potential implications of the pandemic for some bodies have meant that both finance staff and auditors have needed to pay particular attention to the financial position of each entity. Additionally, following a series of increasingly challenging regulatory reviews, auditors have arguably been more focused than ever on their professional duty to give their opinion only when they are satisfied that they have sufficient assurance.”

Consultation on 2023-24 audit appointments – Public Sector Audit Appointments

Public Sector Audit Appointments (PSAA) is consulting on the Draft prospectus for 2023 and beyond.

PSAA state “Our primary aim is to secure the delivery of an audit service of the required quality for every opted-in body at a realistic market price and to support the drive towards a long term competitive and more sustainable market for local public audit services.

The objectives of the procurement are to maximise value for local public bodies by:

Page 23

- securing the delivery of independent audit services of the required quality;
- awarding long term contracts to a sufficient number of firms to enable the deployment of an appropriately qualified auditing team to every participating body;
- encouraging existing suppliers to remain active participants in local audit and creating opportunities for new suppliers to enter the market;
- encouraging audit suppliers to submit prices which are realistic in the context of the current market;
- enabling auditor appointments which facilitate the efficient use of audit resources;
- supporting and contributing to the efforts of audited bodies and auditors to improve the timeliness of audit opinion delivery; and
- establishing arrangements that are able to evolve in response to changes to the local audit framework.”

The plans include proposals to adjust the procurement ratio between quality and costs from an equal 50:50 to 80:20, as well as trying to bring new suppliers in to the market.

The consultation on the PSAA’s proposals closes on 8 July.

Councils given power to build more homes for first time buyers and for social rent – MHCLG

The Ministry of Housing, Communities & Local Government (MHCLG) has announced that councils in England will have more freedom on how they spend the money from homes sold through Right to Buy to help them build the homes needed in their communities.

The MHCLG press release states the “package will make it easier for councils to fund homes using Right to Buy receipts, including homes for social rent, and give them greater flexibility over the types of homes they provide to reflect the needs of their communities.

Page 24
It will also give councils more time to use receipts and to develop ambitious building programmes. The government wants homes supplied using Right to Buy receipts to be the best value for money, and to add to overall housing supply, to help towards delivering 300,000 new homes a year across England by the mid-2020s.”

The press release goes on to note “New measures include:

- extending the time councils have to spend Right to Buy receipts from 3 years to 5 years
- increased cap on the percentage cost of new homes councils can fund from Right to Buy receipts raised from 30% to 40% per home, making it easier to build replacement homes
- allowing receipts to be used for shared ownership, First Homes, as well as affordable and social housing, to help councils build the homes their communities need
- introducing a cap on the use of Right to Buy receipts for acquisitions to help drive new supply.”
