

## **CORPORATE CAPITAL STRATEGY**

### **PURPOSE**

This strategy sets out the Council's approach to capital investment and the approach that will be followed in making decisions in respect of the Council's Capital assets.

Capital investment is an important ingredient in ensuring the Council's vision is achieved and given that capital resources are limited it is critical that the Council makes best use of these resources.

The Strategy sets the policy framework for the development, management and monitoring of this investment and forms a key component of the Council's planning alongside the Medium Term Financial Strategy (MTFS).

It sets out the strategic influences on the Council's capital investment plan and how the Council is going to work with these influences to bring about the best advantage to meet local needs – including working with Partners:

- the Local Enterprise Partnerships (Greater Birmingham and Solihull and Staffordshire and Stoke-on-Trent) of which the council is a Member;
- the West Midlands Combined Authority as a Non-Constituent member;
- Staffordshire Commissioner for Police, Fire and Rescue and Crime;

with the aim to drive economic regeneration, deliver local plan objectives and access inward investment to support the delivery of local capital priorities.

The Council plans to update its approach to Asset Management and long term asset planning to improve the way strategic property objectives can be delivered. This will enable the development of a longer term plan for the management and maintenance of its assets, whilst identifying the funding ambition gap to maximise inward investment opportunities for funding from Partners.

It also demonstrates that the Council has regard to the Prudential Code for Capital Finance by giving a clear and concise view of how much it can afford to borrow and its risk appetite. It is intended to give a high level overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services along with an overview of how associated risk is managed and the implications for future financial sustainability.

### **Summary Capital Investment Plan**

The General Fund capital programme will require unsupported borrowing of £3m over the next 5 years subject to the exploration and availability of alternative funding.

Key Schemes include:

- Future High Street Fund, £1.8m;
- Disabled Facilities Grants, £650k p.a. (including £547k p.a. BCF grant);
- Balancing Ponds, £850k;

- Town Hall improvements £688.8k
- Installation of 3G pitches at Anker Valley £900k and works to changing rooms of £350k;
- £581k various capital works at the Castle including Heating, roofing ,alarms and general repairs
- Energy Efficiency Upgrades-Commercial and Industrial Units, £75k p.a.
- Street lighting, £405k;
- Technology upgrades, £290k;
- Play area refurbishment, £310k;
- CCTV, £229k.

#### Key HRA Schemes:

- HRA Business plan works to dwellings, £21.73m;
- Neighbourhoods £1.0m;
- Disabled Facilities Adaptations £1.25m;
- Street lighting £607k;
- High Rise works £925k;
- Retained Garage Sites, £500k;
- Regeneration & Affordable Housing, £5.75m;
- Sheltered schemes including lifts £830k;
- Fire Risk mitigation works, £600k;
- Damp & Mould works, £500k;
- Decarbonisation works to achieve Zero Carbon, £3.0m.

#### **Impact on Medium Term Financial Plan**

The General Fund capital programme will require unsupported borrowing of £3m over the next 5 years which will be funded through internal borrowing (with an associated loss of investment interest) and will require provision for debt repayment.

#### **Summary of Risk Assessment**

Risks specific to the capital programme and the capital strategy are managed in accordance with the Council's Risk Management Policy and are recorded and monitored through the Pentana Performance Management system. Risks are monitored on an ongoing basis as part of routine risk management practices and are reviewed and updated where appropriate as part of the refresh of the Capital Strategy. Risks specific to the capital strategy are included in a table at **Annex C**. They align with other corporate risk registers and are informed by project/ programme level risks to ensure risks are monitored and managed from operational through to strategic level.

#### **The Capital Strategy**

The Capital Strategy is a 'live' and dynamic document, which will update and evolve as strategic influences and priorities change. The Corporate Capital Strategy will be reviewed annually and an update presented to Council in February each year as part of the MTFs report. However should a significant situation arise, whether it be a policy matter, an investment opportunity or a new risk for example, an update to the Capital Strategy will be presented to Members as part of the quarterly performance report.

The Capital Strategy will:

- Reflect Members' priorities as set out in the Corporate Plan including the approach to the allocation of its capital resources and how this links to its priorities at a corporate and service level;
- Balance the need to maintain the Council's existing asset base against its future ambition and associated long term asset needs, and consolidate assets where appropriate;
- Recognise that growth is the strategic driver for financial self-sufficiency;
- Be affordable in the context of the Council's MTFS;
- Seek to ensure value for money through achieving a return on investment or by supporting service efficiency and effectiveness;
- Be flexible to respond to evolving service delivery needs;
- Seek to maximise investment levels through the leveraging of external investment through working with regional/County partners;
- Recognise the value of assets for delivering long-term growth as opposed to being sold to finance capital expenditure;
- Recognise the financial benefits and risks from growth generated through investment to support investment decisions; and
- Reflect the service delivery costs associated with growth when assessing the level of resources available for prudential borrowing.

The capital strategy informs the strategic direction of capital investment through consideration of strategic priorities and objectives. It feeds into the annual revenue budget and MTFS by informing the revenue implications of capital funding decisions. The implications for the MTFS are fully considered before any capital funding decisions are confirmed.

The Strategy is supported by the leadership of the Council, including the Chief Executive and the Leader of the Council. The CIPFA Prudential Code requires that 'the chief finance officer should report explicitly on the affordability and risk associated with the capital strategy and where appropriate have access to specialised advice to enable them to reach their conclusions.' The statement below is the response of the Executive Director Finance:-

Affordability and risk are key considerations within this capital strategy. The key principles articulated are that the strategy must support the financial viability of the Council, and that payback should be a key consideration of the strategy.

The capital investments detailed within the strategy provide for a number of regeneration opportunities. Robust risk management is also a requirement of our strategy. Business cases for new schemes are required to ensure that risks are adequately considered. The most significant risks are currently the potential for increasing costs due to the impact of inflationary pressures in the current economic climate; capacity to deliver individual projects; and adequately identifying resources required at the commencement of projects.

Over the next five years the strategy is expected to see c.£48.8m of capital expenditure (both General Fund and HRA). The HRA capital programme is a key element of the

30 year HRA Business Plan. Within this financial context and considering the Council's balance sheet and asset base, and its track record in acquiring, managing and disposing of assets where required to support its objectives, the capital strategy as a whole is proportionate to the Council's overall activities and financial position.

Specialised external advice is obtained where required with regard to specific schemes, for example to support commercial acquisitions or in considering the financial implications of major schemes included within the strategy. The Council also utilises our treasury management advisors, Link Asset Services, to consider the implications of the Prudential Code and the impact on the treasury management strategy.

The strategy articulates a wide range of new and existing activities. This includes regeneration ambitions, new infrastructure and significant investment in Housing as well as smaller schemes. The strategy also leaves space for consideration of new income streams that fit with our ambitions as a Council and support areas in which we already have skills and knowledge.

## **Background**

The Council has an ongoing capital programme of over £53.2m for 2022/23 and an asset base valued at £301.3m (as at 31<sup>st</sup> March 2022).

Traditionally the Council's capital programme has been set and approved for a five year period, with a 30 year HRA business plan setting out future plans for the Council's housing stock. In order to improve longer term strategic planning, so that the Council can better prioritise spending and align with local, regional and national priorities, it is recognised that the current capital programme needs to have a longer-term focus for the purposes of the capital strategy, ideally looking to a 20-30 year timeframe.

As a result, the following 2019/20 action plan item was implemented through the development of a 30 year whole life costing model:-

**The process for the consideration of capital expenditure within the MTFS process has been reviewed and refined to ensure that there are provisional plans for expenditure out to a 10 year timeframe, with an indication of requirements out to 20-30 years.**

A number of actions/improvements have been identified throughout this capital strategy, and they are summarised in an action plan, with target completion dates and responsible officers, at **Annex B**.

## **Influences**

The following diagram illustrates some of the main internal and external influences on the Council's capital strategy, including our partners. Consideration of these plans and strategies in the context of our own capital ambitions is important because it may provide new opportunities for investment or funding.

The Council's corporate priorities are an integral influence in informing the Capital Strategy and set the scene for how capital projects and individual proposals are assessed.

The Council is committed to working with its public, peers and partners in order to:

- a) Sustain essential services at agreed standards for those in greatest need;
- b) Deliver a programme of projects, planned initiatives and work streams designed to achieve outcomes against the Corporate Priorities;
- c) Adopt a commercial approach to growth and investment designed to generate a sustainable income to support a) and b); and
- d) Continue its excellent performance in financial planning, management and investment. By being 'Risk Aware' rather than 'Risk Averse', the Council will consider all opportunities to improve and/or sustain services.

## The Capital Appraisal Process

The capital appraisal process is important as it helps to prioritise schemes in order to target spending in a challenging funding climate, and to ensure that the Council is spending on projects which help to deliver its strategic priorities.

As part of the Council's business planning process, managers and Assistant Directors are required to consider the capital resources needed to deliver their services now and into the future (5 year timeframe). The asset management plan and HRA business plan also inform the capital strategy.

All capital bids should be prepared in light of the following list of criteria, and the proposed investment should address and be assessed with regard to:

- the contribution its delivery makes towards the achievement of the Council's Corporate Priorities;
- the achievement of Government priorities and grant or other funding availability;
- the benefits in terms of compliance with the Corporate Capital Strategy requirements of:
  1. Invest to save
  2. Maintenance of services and assets
  3. Protection of income streams
  4. Avoidance of cost.

The current de-minimis for capital expenditure is £10k per capital scheme.

It is important that capital investment decisions are not made in isolation and instead are considered in the round through the annual budget setting process.

All proposed schemes requiring capital investment should have as a minimum the following information:

- A description of the scheme;
- The expected outputs, outcomes and contribution to corporate objectives;
- The estimated financial implications, both capital and revenue;
- Any impacts on efficiency and value for money;
- The nature and outcome of consultation with stakeholders and customers (as applicable);
- Risk assessment implications and potential mitigations; and
- Any urgency considerations (e.g. statutory requirements or health and safety issues).

Corporate Management Team and Service Managers identify the potential need for capital investment, in light of external influences, internal strategies and plans, service delivery plans and, in particular, the Asset Management plan. This is seen as a core influence on the Capital Strategy, and informs the priorities and schemes considered as it takes account of issues such as the condition of council owned assets and future maintenance requirements. Other key considerations are health and safety requirements, statutory obligations of the council, operational considerations and emerging opportunities for investment including possible sources of external financing.

The Asset Strategy Steering Group (ASSG) review capital bids prior to consideration by Members. Once capital bids have been prioritised, Executive Management Team will review the outcome of the deliberations of the ASSG and will make recommendations to Cabinet through an updated Medium Term Financial Strategy (MTFS) report on a proposed budget package which will include capital budget proposals. The MTFS report (including capital budget proposals) will ultimately be considered by Budget Setting Council each year.

It was recognised last year that further action is required to fully embed the capital appraisal process, including proper consideration of options and risk, into the capital strategy and planning processes at Tamworth, and ensure that this is not just a 'tick-box' exercise. Therefore the following action plan task has been implemented:-

- 1) Consideration of service units' capital requirements now form part of the business planning process and a template has been drawn up to ensure this is properly considered and captured on Pentana, the performance management system;**
- 2) The capital appraisal process and associated documentation has been reviewed and updated to ensure proper consideration given to whole life costs of scheme. Further work is needed to further improve the consideration of alternative options; risk management, etc, and to address the concerns outlined on completion of the CIPFA Property Capital Strategy Self-Assessment Checklist.**

### **Monitoring of Approved Capital Schemes**

Each capital scheme has a budget holder/project manager who is responsible for ensuring progress against scheme in line with agreed timescales and for ensuring adherence to the approved budget. The Collaborative Planning (CP) system is used to monitor spend against budget and to inform the projected outturn position. The budget holder/project manager will hold monthly meetings with his/her Accountant to update budget monitoring information on the system and provide a brief commentary as to the progress of each project. Projected capital slippage and potential re-profiling of associated budgets is also reported. The monitoring of progress on individual schemes is reported to Corporate Management Team on a monthly basis and to Cabinet quarterly as part of Financial and Performance Healthcheck reports.

An annual Capital Outturn report is prepared for Cabinet in June each year which details the final outturn for the year, the latest project update from the Service Manager and any proposals to re-profile spend to future financial years for Cabinet approval.

A post implementation review is not appropriate or necessary for all capital projects. They should be prepared where learning is identified which could assist future projects or where there is a significant financial or political impact. Directors should encourage the collation of data during the project and identify any lessons learned which will assist in improving the process in the future.

**As part of the approved Strategy, the following action plan tasks have been implemented:**

- a) A post implementation review is completed for each scheme where learning is identified which could assist future projects or where there is a significant financial or political impact;**
- b) The Asset Strategy Steering Group now meet on a Quarterly basis to:
  - i. scrutinise the completed post implementation reports;**
  - ii. review the management and monitoring of the capital programme; with appropriate feedback and challenge – identifying improvements to improve the future management of the capital programme.****

The full capital appraisal and monitoring process and guidance for managers can be found on the intranet at this link:-

<http://infozone.tamworth.gov.uk:901/financial-guidance>

**A review of the guidance to reflect changes implemented is planned for 2022/23.**

## Review of Asset Management Plan

The Council's Asset Management Plan will be reviewed on an ongoing basis. This will identify any assets held by the Council that are no longer either required or fit for purpose and appropriate recommendations made regarding retention for alternative use or disposal.

During 2021/22, the Council contracted Michael Dyson Associates to undertake a review of our Corporate Asset Management Strategy, which had previously been updated in 2015, in order to identify potential areas for improvement. Their subsequent report found that we had a robust asset management strategy in place in 2015 with a relatively small number of improvements required to meet the general conditions of good practice as outlined by CIPFA. The main areas identified for improvement were evidence based policies and procedures to underwrite a new asset management strategy. As a result, an overarching draft asset strategy, draft acquisitions policy, draft disposals policy, and draft asset management plan were considered by Corporate Scrutiny Committee in December 2022. These are currently being developed following feedback and will be presented to Cabinet for approval in due course.

The draft Corporate Asset Management Strategy identifies the following non-Housing assets:

<b>Asset Description</b>	<b>Value (31/03/22)</b>
Heritage & Leisure	£3.7m
Land and Buildings	£23.5m
<b>Total</b>	<b>£27.2m</b>

An updated survey was carried out by Michael Dyson Associates during 2021 to determine the current condition and extent of repair and maintenance required. The overall planned maintenance cost for the assets in the next 30-year period amounts to £5,611,576, an average of £37,916 per surveyed asset (over the portfolio of 178 non-HRA properties which include a mix of commercial premises, shops and corporate properties).

It has been identified that the Council, through this strategy and through the development of a long term strategic plan, needs to take a longer-term view of the assets required to deliver its Corporate Plan priorities and to support its Medium Term Financial Strategy (MTFS), including spend required (and associated potential funding streams) to address the identified maintenance and repairs backlog for corporate assets. This could include the option to invest in or dispose of current asset holdings or make further acquisitions.

Significant work has been undertaken in this area in order to deliver a robust capital strategy, and the following action is to be completed by March 2023:-

**The Asset Management Plan is to be reviewed and updated, with an up to date stock condition survey. This should set out the detailed capital resources/expenditure required to maintain assets, together with the associated timeframe, to inform options appraisal and feed into the capital strategy for ASSG/CMT review of potential schemes.**

## HRA BUSINESS PLAN

The Local Plan to 2031 has a target of 177 units of new housing, of which only 40 units per year are likely to be delivered by private developers. This represents only 21% of the total required number of new affordable homes – leaving 79% of need unmet.

The HRA Business Plan has the potential to address some of this unmet need. However the extent to which it can make up a shortfall depends on the resources available within the HRA. The 30 year business plan is currently under review following the decision by the Government to cap social housing rent increases at 7% for 2023/24, and in light of the net zero/carbon reduction agenda which would require significant capital spend on the housing stock. Early indications from the modelling are a potential shortfall over 30 years of £42m plus a significant and unsustainable increase in HRA debt levels arising from the capital programme pressures (of over £200m over 30 years).

The current draft Asset Management strategy identifies HRA housing stock and garages with a value of £242m as at 31<sup>st</sup> March 2022. This includes 2,784 houses and bungalows, 666 high and medium rise flats and 886 low rise flats. The latest stock condition survey report received from Michael Dyson Associates as at April 2019 surveyed 850 properties and identified overall planned maintenance costs over the 30 year period of £27.5m, equating to an average of £32k per surveyed property. When this was extrapolated across the entire housing stock, the planned maintenance profile increased to a total estimated cost of £128m over the 30 year period.

As at April 2018, the Council's stock comprised 4,269 homes, 390 leasehold properties and 1,454 garages. Of the 4,269 homes, 2,391 (56%) are houses, 1,278 (30%) flats or maisonettes, 235 (5.5%) are bungalows. A further 365 properties (8.5%) are sheltered accommodation located in 10 separate schemes and comprising a mixture of flats and bungalows. 1,029 properties (24%) are of non-traditional construction. The construction type, location and mix of properties in Tamworth have implications for the Investment Programme and Business Plan.

We know that resources within the Business Plan are unlikely to allow the Council to achieve all that it wants to do. However, over the course of the next thirty years opportunities may arise and there may be scope to progress these if the Business Plan has capacity at the time.

Three areas in particular will continue to be actively considered as priorities if additional resources become available:

- New affordable housing
- Regeneration of additional estates
- Investment in early help and preventative based strategies

Where savings are achieved when delivering existing Business Plan commitments, these may be used on the priority areas above.

## **DEBT AND BORROWING AND TREASURY MANAGEMENT**

Details of the Council's borrowing need (Capital Financing Requirement – CFR), current and forecast debt, and other prudential indicators, as required by the CIPFA Prudential Code for Capital Finance, will be set out in the Treasury Management Strategy Statement, Treasury Management Policy Statement, Minimum Revenue Provision Policy Statement and Annual Investment Strategy 2023/24.

### **Capital Funding Streams**

Decisions on capital investment should be made in the context of limited resources. The capital programme is currently reliant on funding from capital receipts and third party contributions/external grants. Other potential funding opportunities for future consideration include external borrowing and direct revenue funding (from other sources such as revenue contribution).

**External Grants** – external grant allocations are received from central government, for example Disabled Facilities Grant, and also other organisations such as the Heritage Lottery Fund (which part-funded the Assembly Rooms project).

**Section 106, CIL and External Contributions** – S106 contributions from developers can support Leisure and open space programmes in the Borough.

**Capital Receipts** – the Council is able to generate capital receipts through the sale of surplus assets such as land and buildings and has benefitted from £24m as a result of the sale of the Golf Course at Amington, which is earmarked for investment under the Council's Commercial Strategy. The potential for future sales will be determined as part of the Council's Asset Management Strategy, to be refreshed as per the action plan detailed previously. Any further capital receipts generated will be reinvested in the capital programme.

**Reserves** – the Council has a level of reserves which are earmarked to be used to support delivery of the Corporate Plan or Invest to Save projects.

**Revenue Funding** – the Council can use revenue resources to fund capital projects by making a 'revenue contribution to capital,' however continuing revenue budgetary constraints mean this option is limited.

**Prudential Borrowing** – the introduction of the Prudential Code in 2004 allows Councils to undertake unsupported borrowing which is subject to the requirements of the Prudential Code for Capital Expenditure. The Council must ensure that unsupported borrowing is affordable, prudent and cost effective. This type of borrowing has revenue implications for the Council in the form of financing costs.

## APPROACH TO RISK MANAGEMENT

The Council is committed to the culture of Risk Management ensuring that its reputation is not tarnished by an unforeseen event nor is it financially or operationally affected by the occurrence. The risks considered in the capital strategy are considered with reference to the corporate risk management policy and practices. The Risk Management Strategy and further information can be accessed at the following link:-

<http://infozone.tamworth.gov.uk:901/risk-management>

### Risk Appetite

The risk appetite is “the amount of risk that an organisation is prepared to accept, tolerate, or be exposed to at any point in time” (CIPFA). The Council will manage the risks by reducing, preventing, transferring, eliminating or accepting the risk.

Whilst the Council acknowledges that it will have “severe” (red) risks from time to time, it will endeavour to reduce those to an acceptable level either through controls or ceasing the activity (if applicable). Sometimes risks are identified and even though managed, may still remain “severe” (red risk).

### Risk Management Roles and Responsibilities

The importance of establishing roles and responsibilities within the risk management framework is pivotal to successful delivery. Considering risks must be embedded into corporate policy approval and operational service delivery.

The agreed roles and responsibilities within the risk management framework are outlined in the table below:

<b>Group /Individual</b>	<b>Role</b>
Corporate Management Team	<ul style="list-style-type: none"><li>• Provide leadership for the process to manage risks effectively.</li><li>• Review and revise the Risk Management Policy and Strategy in accordance with the review period.</li><li>• Monitor and review the Corporate Risk Register on a quarterly basis including the identification of trends, upcoming events and potential new corporate risks.</li></ul>
Audit & Governance Committee	<ul style="list-style-type: none"><li>• Monitor the effectiveness of the Authority’s risk management arrangements, including the actions taken to manage risks and to receive regular reports on risk management.</li><li>• To monitor the actions being taken to mitigate the impact of potentially serious risks</li></ul>
Cabinet	<ul style="list-style-type: none"><li>• To provide strategic direction with regard to risk management.</li></ul>
Directors / Assistant Directors	<ul style="list-style-type: none"><li>• To provide leadership for the process of managing risks.</li></ul>

Group /Individual	Role
	<ul style="list-style-type: none"> <li>• To ensure that risk management methodology is applied to all service plans, projects, partnerships and proposals.</li> <li>• To identify and manage business /operational risks.</li> <li>• To ensure that the management of risk is monitored as part of the performance management process.</li> </ul>
Directors / Assistant Directors	<ul style="list-style-type: none"> <li>• To ensure that all risks are identified, recorded and effectively managed in their area or responsibility.</li> <li>• To review and update their risk register on at least an annual basis but appropriate to the risk.</li> <li>• To determine the method of controlling the risk.</li> <li>• To delegate responsibility if appropriate for the control of the risk.</li> <li>• To notify the Director of new risks identified for consideration for inclusion on the corporate risk register.</li> </ul>
All staff	<ul style="list-style-type: none"> <li>• To ensure that risk is effectively managed in their areas.</li> <li>• To ensure that they notify their managers of new and emerging risks.</li> </ul>
Assistant Director – Finance	<ul style="list-style-type: none"> <li>• To ensure that the risk management strategy is regularly reviewed and updated.</li> <li>• Promote and support the risk management process throughout the Authority.</li> <li>• Advise and assist managers in the identification of risks.</li> </ul>

The Audit & Governance Committee will regularly review the Risk Management Policy and Strategy to ensure their continued relevance to the Borough. They will also assess performance against the aims and objectives.

Specific capital risks are contained within a register at **Annex C** to the Capital Strategy, alongside mitigating actions.

## **COMMERCIAL ACTIVITY**

The Council's Commercial Investment Strategy set out a number of alternative investment options to generate improved returns of c. 4% p.a. (plus asset growth) including:

- Set up of trading company to develop new income streams;
- Local investment options – Lower Gungate development including the potential to drawdown funding from the Local Growth Fund/ Local Enterprise Partnerships (GBS and Staffordshire);
- Investments in Diversified Property Funds – a savings target to return c.4% p.a.

Note: these would represent long term investments of between 5 – 10 years (minimum) in order to make the necessary returns (after set up costs).

CIPFA defines commercial investments as those which are taken for mainly financial reasons. These may include investments arising as part of business structures, such as loans in subsidiaries or other outsourcing structures; or investments explicitly taken with the aim of making a financial surplus for the organisation. Commercial investments also include non-financial assets which are held primarily for financial benefit, such as investment properties.

The Code requires that such investments are proportional to the level of resources available, and that the same robust procedures for the consideration of risk and return are applied to investment decisions. All such investments are therefore included within the capital strategy/investment strategy, setting out the risk appetite and including specific policies and arrangements for such investments, and details of existing material investments and risk exposure.

### **Investment in Property Funds**

As part of the Capital Programme, the Council has since 2018/19 invested in Commercial Property Funds to establish a portfolio which is managed to generate a revenue return to the Council to support financial sustainability and to protect the provision of services to residents, along with maintaining and growing the capital value of the investment. A capital scheme of £12m was included within the 2018/19 capital programme to generate a target net additional income of c. £300k per annum, financed from part of the capital receipt from the sale of the former Golf Course.

To date, the Council has invested £1.85m with Schroders UK Real Estate Fund, £6.057m with Threadneedle Property Unit Trust, and £4.057m with Hermes Federated Property Unit Trust, total investment £11.962m. Although the capital values of the funds did initially fall, mainly since 31<sup>st</sup> March 2020, they then recovered and as at 31<sup>st</sup> March 2022 there was an overall gain of £1.32m. However, since then capital values have fallen again, and as at 30<sup>th</sup> September the valuation stands at £12.89m, with an overall gain of £928k. It should be noted that investments in property are subject to fluctuations in value over the economic cycle and should yield capital growth in the longer term as the economy grows.

Fund Valuations	Investment	Valuation 31/03/2019	Valuation 31/03/2020	Valuation 31/03/2021	Valuation 31/03/2022	Valuation 30/09/2022

Performance information is received from each fund on a monthly/quarterly basis and a monitoring spreadsheet has been established to track income received and growth in the funds. Income generated is reported to CMT monthly and to Members quarterly as part of regular financial healthcheck reports, as well as in the regular Treasury Management reports presented to Cabinet and Council (three each year). Performance management/monitoring is also undertaken with reference to the financial press and Link Asset Services advice.

The annual revenue return is dependent on the property fund achieving rental income returns on the commercial property portfolio which has been relatively stable in the past due to the quality of the commercial property owned by the fund. With regard to the growth (or contraction) in the overall asset value – over the longer term, growth has been consistent but can be subject to market correction (and losses) in the short term. However, it has been recognised that the funds will be a long term investment for 10-15 years and would not be redeemed to realise a loss. A budget / reserve of £800k will also be available to mitigate any losses.

### **Regeneration of Town Centre and Purchase of Gungate site**

Council on 11<sup>th</sup> April 2018 approved the purchase of the Gungate site within Tamworth town centre, incorporating the site of the former Gungate shopping precinct; a private pay and display car park currently leased to NCP for a term of 26 years; and a Council run pay and display car park leased to the Council on a peppercorn lease until 2062. This was funded from a £4million capital budget financed from capital receipts from the sale of the Golf Course. Following the purchase of this site, the Council is now in receipt of an additional income stream in respect of the area leased to NCP.

The Council is entitled to purchase land to hold as an investment and regeneration opportunity under the Local Government Act 1972; and the Local Government Act 2003 gives the Council the power to invest for any purpose relevant to its functions under any enactment, or for the purposes of the prudent management of its financial affairs.

As part of this report, Members also approved the development of a regeneration opportunity including further site acquisition should this be beneficial; including formal negotiations with Staffordshire County Council and Staffordshire Police to look at the inclusion of land bordering the site; and to commence masterplanning works to bring the site to a commercially viable development opportunity. The report to Council recognised that any return from future redevelopment is not guaranteed, and that it could take several years to get a major regeneration project up and running. Initial plans are for a mixed housing/leisure development.

The Council has been working with Aspinall Verdi and Altair to develop options for the site, and resources were secured from the Local Government Association (LGA) to pay for 40 days' consultancy; and an £80k grant was received from the Greater Birmingham and Solihull Local Enterprise Partnership. This resulted in the development of a masterplan for the Gungate North site, and following the Government announcement of a further round of bidding for funds under their Levelling Up Fund Round 2 programme, a business case and bid was submitted for a scheme to regenerate the Gungate North site.

The scheme comprises a high quality, net zero, sustainable office development, a convenience store, multi-storey car park and a college facility for students with high support needs. The bid for Government Levelling Up Funds totals £19.7m, with £6.3m Council funding, of which £4m is planned to be re-purposed from the Solway capital allocation, and including £1.4m expected capital receipt from the sale of land at Solway Close. We are currently awaiting Government's announcement of successful bids, expected towards the end January.

With regard to the Gungate South site, discussions held with Homes England to assist the Borough Council in unlocking the potential of regeneration sites across the town resulted in a Heads of Terms signed off by Cabinet on the 30th September. Work is continuing with Homes England, who have recently awarded the Council £100k to develop an investment strategy for potential housing sites within the borough.

### **Solway (Tamworth) Ltd**

In line with plans set out in the Commercial Investment Strategy, Council on 17<sup>th</sup> July 2018 approved the establishment of Solway (Tamworth) Ltd, a trading company to be wholly owned by the Council, with the Chief Executive, Leader of the Council and Executive Director Finance as Directors of the Company. The disposal of land owned by the Council at Solway Close to be purchased by the Company for the development of private housing for rent was also approved, with a budget of £4million being established from capital receipts from the sale of the Golf Course to provide a loan for the company to purchase the land.

However, progress on this project was restricted due to a number of other priorities and issues taking precedence including; purchase and master planning of the Gungate site, uncertain financial markets, the Future High Streets Fund process, Internal Corporate restructure and the ongoing COVID-19 pandemic.

Following an update on the progress made on this project to Corporate Scrutiny Committee in March 2022, including updated options for the site based on latest market demand, costing information, projected returns and assessment of the risks involved, and in light of the changing economic situation and the development of the LUF bid above necessitating the use of the £4m earmarked for Solway, the decision was made to shelve plans for developing the Solway site via the limited company, and instead to market the site for sale to a private developer.

### **Future High Streets Fund**

The Government Future High Streets Fund was launched at the start of 2019 as part of a package of interventions aimed at improving Town Centres. Tamworth submitted its Expression of Interest (EOI) by the short deadline of March 22<sup>nd</sup> 2019. The EOI had to primarily focus on the story of the Town Centre and its need for this funding. The fund will grant between £5million and £25million to projects that will structurally transform Town Centres and meet local challenges. There was no requirement in the EOI to provide detailed projects, instead just provide short summaries of potential opportunities for which the funding could be used.

The £625 million fund had the following objectives:

- Investment in physical infrastructure
- Acquisition and assembly of land including to support new housing, workspaces and public realm.
- Improvements to transport access, traffic flow and circulation in the area.
- Supporting change of use including (where appropriate) housing delivery and densification.
- Supporting adaptation of the high street in response to changing technology.

The key challenges articulated in the EOI for Tamworth Town Centre were:

- High levels of vacant properties (predominantly retail – 14.2%)
- Unbalanced housing, retail and office accommodation offer, above average number of retail units, below average number of offices and homes.
- Limited night time economy: poor food drink and evening leisure offer.
- General perception that the Town is a dated, unsafe and unattractive environment.

During December 2020, the Government confirmed that the Council has been awarded £21.65m, from the Government's £1bn Future High Streets Fund to renew and reshape town centres, to deliver a number of projects designed to create a town centre that meets the needs of 21st century residents, shoppers and visitors. It will bring town centre landowners, businesses, councils and other partners together, working on the common goal of reshaping the town centre into a place that Tamworth residents are proud of, that is economically successful and that draws visitors from around the country.

There are three main schemes of work now underway under the Future High Street Fund projects – Castle Gateway; Middle Entry and College Quarter. The Castle Gateway scheme includes work to redevelop empty shop units; demolish an unsightly building enabling the opening up of the Castle bridge and public realm landscaping. The Middle Entry project comprises the redevelopment of shop units into a flexible space with associated public realm works. The College Quarter involves the demolition of part of the Co-Op building and construction of a new college on the site, with the remaining building being redeveloped into a Enterprise Centre.

Each of the projects is currently progressing well, with Armac starting on site for the Co-op retail store demolition and with tenders for the main contractor for the Flex, Middle Entry improvements, Enterprise Centre and Peel Café underway. Progress has been made with the Market Street Properties and Castle Bridge designs. As the design process progresses, the scope of works are further refined which gives a more accurate picture of the costs associated with delivering the programme. Whilst construction costs are higher than expected due to inflation and the rising cost of materials, the continued review of the cost plan and input from contractors during the tender process will determine the real costs associated with the works.

There are contingency funds allocated across the Programme to mitigate risks associated with the Programme of works. The contingency funds allocated to risks across the Programme are continually reviewed as new survey information becomes available and will shed light on what are likely risks and associated costs and inform decisions as to what elements of the schemes can be reduced to remain within budget.

## Commercial and Industrial Property

The following table details the Council's current holding of commercial and industrial property.

INVESTMENT	VALUATION @ 31/03/21 £	ESTIMATED INCOME 2021/22 £	RETURN %	VALUATION @ 31/03/22 £	ESTIMATED INCOME 2022/23 £	RETURN %
Amington Industrial Estate (ground rents)	6,592,000	302,720	4.59	7,460,000	302,720	4.06
Lichfield Industrial Estate (ground rents plus 1 leased plot)	2,947,000	117,950	4.00	3,541,000	135,200	3.82
Local Centre Shops	2,421,250	222,660	9.20	2,479,500	233,191	9.4
Misc Corporate Property	18,641,896	1,183,425	6.35	17,655,450	1,192,155	6.75
Sandy Way Industrial Units	2,642,900	293,767	11.12	3,835,400	300,225	7.83
Tamworth Business Centre	1,132,900	125,848	11.11	1,313,000	129,657	9.87
Town Centre Shops	1,794,452	140,677	7.84	1,787,602	137,732	7.7
<b>Total</b>	<b>36,172,398</b>	<b>2,387,047</b>	<b>6.60</b>	<b>38,071,952</b>	<b>2,430,880</b>	<b>6.38</b>

The corporate asset management strategy report prepared by Ridge in October 2015 indicated estimated costs of maintenance over 10 years of £3.288m for non-operational commercial property and £1.861m for non-operational retail property.

An updated survey has been carried out by Michael Dyson Associates during 2021 to determine the current condition and extent of repair and maintenance required. The overall planned maintenance cost for the assets in the next 30-year period amounts to £5,611,576, an average of £37,916 per surveyed asset (over the portfolio of 178 non-HRA properties which include a mix of commercial premises, shops and corporate properties).

Heating	£500	£300	£0	£0	£300	£0	£10,620	£0	£600	£0	£12,320
Chimney	£0	£0	£0	£0	£0	£0	£1,800	£9,000	£1,200	£0	£12,000
Items <£10k	£3,500	£0	£350	£0	£8,022	£12,520	£4,600	£13,290	£1,710	£0	£43,992
<b>Grand Total</b>	<b>£75,903</b>	<b>£211,578</b>	<b>£96,906</b>	<b>£25,345</b>	<b>£654,355</b>	<b>£1,657,392</b>	<b>£1,369,790</b>	<b>£730,463</b>	<b>£524,553</b>	<b>£265,291</b>	<b>£5,611,576</b>

The above assets currently deliver a return for the Council and assist in balancing the MTFs. The capital programme includes £75k p.a. to ensure Industrial properties are compliant with the Energy Act and have Energy Performance Certificates as with effect from April 2018 it will not be possible to enter into long term lease agreements for commercial and industrial units with an EPC rating of 'E' or less. Many of our units fall into this category and will require a degree of improvement once they become vacant in order to relet.

The Council also has a Building Repairs Fund of c.£400k p.a. which should be included in the planned approach to asset management.

A disposals policy is in place at the Council, however there is currently no plan or strategy to manage those assets which may be surplus to requirements/do not generate a return. It is recognised that the following actions need to be finalised in phases over the next 3 years, informed by the results of the Stock Condition survey and updated Asset Management plan:-

- 1) Following receipt of the updated Asset Management Strategy, an Asset Management Plan for each property should be developed, including an asset viability model, identifying demand, costs and income generated for each group of assets. The Asset Strategy Steering Group should receive the results of the viability modelling, and regular reports monitoring the performance of commercial property in order to identify poorly performing and well performing assets, and as a result develop a plan for future maintenance and investment, and options appraisal/disposals plans as appropriate.**

- 2) Risk register around corporate asset management to be developed
  
- 3) A planned approach to be established for the use of the Building Repairs Fund for both planned maintenance & responsive repairs & Building Condition Standards.

## **KNOWLEDGE AND SKILLS**

Treasury Management staff are either AAT or CCAB qualified and the three CCAB qualified staff must complete the annual CPD requirements of their professional accountancy bodies. Link Asset Services are currently contracted to provide treasury management advice and guidance, and have also been engaged to provide other one-off pieces of work, eg. property funds review in early 2018 and guidance/review of the draft Capital Strategy in December 2018.

Training for Members with regard to treasury management is undertaken on a regular basis, most recently in February 2022. In February 2018, there was also a presentation to Members from Link Asset Services with regard to our investments in property funds.

With regard to non-treasury investments, the Council employs qualified and experienced staff such as accountants, solicitors and surveyors. It is fully supportive in providing access to courses both internal and external to enable those staff to complete their Continuing Professional Development (CPD) requirements.

The Council ensures that its Members are qualified to undertake their governance role by providing training opportunities and access to workshops, etc.

The Council also procures expert advice and assistance such as financial and legal advice as and when required.

## CAPITAL PROGRAMME 2023/24 – 2027/28

Following a review of the Capital Programme approved by Council on 22<sup>nd</sup> February 2022, a revised programme has been formulated including additional schemes which have been put forward for inclusion.

A schedule of the capital scheme appraisals for the General Fund (GF) & Housing Revenue Account (HRA) received for consideration is attached at **Appendix H – General Fund (GF) and Appendix I – Housing (HRA)**, together with the likely available sources of funding (capital receipts / grants / supported borrowing etc.).

With regard to the contingency schemes/allocation, **£250k** remains in current year GF contingency funds and **£100k** remains in current year HRA contingency funds (which will be re-profiled into 2023/24 to provide contingency funding).

To inform discussions, the proposals have been reviewed by the Asset Strategy Steering Group and Corporate Management Team with initial comments & suggestions for each of the schemes outlined below.

### General Fund

#### 1) Capital Repairs Programme - Castle

##### **Project Score: 9**

A new appraisal form has been prepared totalling £375k for completion of repair and maintenance works to the Scheduled Monument identified in Condition Report 2019 as urgent or required (desirable) within 10 years.

Year one design and prelims (£100k), year two capital works delivery (£250k).

#### 2) Capital works required to general fund assets

##### **Project Score: 18**

2 new appraisal forms have been prepared totalling £2.426m for the following works:

£50k, Renewal of lighting at depot (Form 2). This has been based on a survey that has indicated that the lighting is no longer fit for purpose

£120k, Improved security at Depot including gates, alarms and access

£800k, Roofing and renewal of walkways to Ellerbeck & Caledonian shops

£350k, Refurbishment of Anker Valley changing rooms to improve facility and address water storage/heating issues (over 2 years)

£900k, Installation of 3G pitches at Anker Valley

£60k, Fire and Intruder Alarm Renewals at Tamworth Castle

£36k, Heating Renewals at Tamworth Castle

£110k, Roofing Renewal at Tamworth Castle

---

**3) Town Hall Improvements**

---

***Project Score: 8***

A new appraisal form has been prepared totalling £959k for various elements of improvement to the Town Hall to make better use of the space as the primary location for Civic meetings as shown below.

£401k year 1, Internal refurbishment, fit out and reconfiguration

£288k year 1, M&E works, lift, heating, fireplaces, bathroom and kitchen

£270k year 2, Improvement to Butter Market area

---

**4) Replacement of Open Space Assets**

---

***Project Score: 12***

A new appraisal form has been prepared totalling £100k for works as shown below.

£20k, year 1 to Replace missing boardwalk and jetty at Warwickshire Moor. The boardwalk at Warwickshire LNR has been vandalised for a second time and requires replacement

£80k, year 2 to Replace the existing wooden Snowdome footbridge. A recent structure inspection highlighted that the existing wooden footbridge near to the Snowdome will require replacement in the medium term.

---

**5) Play Area Refurbishment**

---

***Project Score: 12***

A new appraisal form has been prepared totalling £100k for works as shown below.

£90k, year 1 - aim to complete two play area refurbishments, each area requires in the region of £50k, however there is £25k section 106 funding available to use for one of the designated play area.

£50k p.a. years 2-5 - complete one play area refurbishment p.a.

---

**6) Civica Digital Image Store**

---

***Project Score: 12***

A new appraisal form has been prepared totalling £56k for the upgrade of Civica Digital360 environment to supported version (£44k). Technical refresh of Windows 2012 servers (out of support with Microsoft next year), Implementation of Digital Image Store (£12k) replacing the out of support image server.

---

---

---

**7) With regard to the provisional programme:**

---

**a) Balancing ponds and sustainable drainage systems**

---

***Project Score: 63***

---

A 30 year rolling programme of works was approved for inclusion in the capital programme, with an annual spend required from 2023/24, for the 8 ponds at Stoneydelph, Belgrave, Lakeside, Peelers Way.

The total cost of the programme over 30 years is £4.68m partially financed by existing reserves of £604k and annual revenue contributions totaling £1.92m, leaving a balance of £2.156m (from existing reserves/retained fund (£200k), Section 106 commuted sums (£404k) and ongoing annual revenue contributions (of £64k p.a.).

---

**b) Technology Improvement/Replacement**

---

***Project Score: 12***

---

A rolling programme was approved for £60k in 2023/24 followed by £40k p.a. – a revised capital appraisal has been received to revise this to £50k in 2023/24 followed by £60k p.a.

Significantly increased reliance on ICT has resulted in a commitment to ongoing, large scale upgrade and maintenance to the TBC infrastructure, in line with technology lifecycles. The Council is also on a journey towards digital transformation and self service for customers, demand for flexible resilient and available ICT services to support this requires continued investment into the authorities hardware and associated software. The organisation is also establishing new, more flexible and agile ways of working which requires investment into technology to support ongoing effectiveness.

---

External factors including legislative requirements from central government in the guise of the Public Sector Network (PSN) Code of Connection, and the increase in required investment into cyber security to keep the councils network secure and available means continued investment is essential. It should be noted that corporate applications are excluded from this schedule of planned work.

---

**c) Endpoint Protection and Web-Email Filter**

---

***Project Score: 60***

---

A rolling programme was approved for £40k in 2022/23 followed by £40k every 3 years for Endpoint Protection (covering Anti Virus, Anti Malware and Encryption and the contract for Web and Email filtering).

---

---

**d) Street Lighting**

---

A rolling programme was approved with an annual spend required from 2016/17. The Council has its own stock of street lighting across the borough, mainly in housing areas and other communal parts such as play areas and car parks. The street lighting assets are inspected and maintained by Eon on behalf of the Council under the terms of Staffordshire County Council PFI contract with Eon. Eon have produced a replacement street lighting programme which spans 40 years and include the replacement of all the lighting columns based on 'their life expectancy' and a lighting head replacement programmed based on providing more efficient low energy lighting heads. This appraisal is based on years 5-10 years of the replacement programme. The 40 year programme costed programme has been submitted as a whole life cost document.

---

**e) Disabled Facilities Grants (DFG)**

---

The provisional programme included £650k p.a. part funded by redistributed Better Care Fund (BCF) grant of £547k.

---

**f) Energy Efficiency Upgrades to Commercial & Industrial Units**

---

A rolling programme with an annual spend of £75k was approved from 2017/18.

---

To fund a degree of improvement to industrial units when they become vacant in order to be able to re-let them – as, with effect from April 2018, it will not be possible to enter into long term lease agreements for commercial and industrial units with and EPC rating of 'E' or less.

---

Depending on void levels, we could expect to lose around £20k p.a. increasing by £20k p.a. for the next 5 years (c.£300k over 5 years).

---

If we are able to let on License or Tenancy at Will arrangements we may be able to maintain a level of income but there will be an increase in other costs such as NNDR payments, repair costs, security costs and the like.

---

Investment in enveloping works to improve energy efficiency will prolong the life of the estate at the current rent levels but ultimately Sandy Way phase 2 will require a more significant investment project to give a long life expectancy.

---

**g) CCTV Upgrades**

---

Following approval of the Shared Service, Capital budgets of £45,714 p.a. have been included – part funded by OPCC grant of £24k p.a.

---

**h) Refurbishment of Play Areas**

---

Following approval a year 1 £35k budget, an additional £20k was approved for year 2 in 2023/24.

---

**i) Future High Street Funding**

---

The final year allocation of £1,848,810 was approved – funded by the Councils contribution from the capital receipt from the Golf Course sale.

---

---

**8) General Fund Capital Contingency Budget**

---

The remaining 2022/23 contingency budget totalling £250k will be rolled forward to 2023/24.

---

### Housing

There have been some changes in the Housing capital programme from that provisionally approved – with a number of new schemes proposed. It has also been updated to include the new year 5 costs for 2027/28.

It should be noted that there are no debt repayment costs for the HRA and the Government has now lifted the previous debt cap (of £79.407m). The current HRA Capital Financing Requirement (CFR) stands at £69.893m with planned borrowing in 2022/23 of £1.688m.

---

**Housing Revenue Account**

---

The provisional capital programme has been reviewed and updated:

---

**a) Structural Works, Bathroom Renewals, Major Roofing Renewals and Disabled Facilities Adaptations**

---

Structural works budgets have been decreased by £75k p.a. to £200k p.a. from year 2, 2024/25 (from an increase of £75k p.a. last year)

Neighbourhood regeneration budgets have been reduced by £150k p.a. from year 2, 2024/25 to £0.5m p.a.

Electrical rewiring budgets have been reduced by £50k p.a. to £100k p.a. from year 2, 2024/25

Sheltered Lifts and Stairlift renewals has increased by £110k in 2023/24 (previously £250k) and £200k in 2024/25 (previously £50k)

---

**b) Decarbonisation**

---

The 3 year programme has been brought forward a year to 2023/24 (£2.5m p.a.)

---

**c) Street Lighting**

---

HRA share continues in line with the approved 30 year programme

Existing Capital schemes have continued in line with the provisional programme (including the new year 5 and capital salaries recharge of £200k p.a. for management of the programme) with the following additions:

---

**1) Improvements to Retained Garage Sites**

---

A new capital submission had been prepared for spend of £500k in 2023/24.

---

**2) Drainage to High Rise**

---

A new capital submission had been prepared for spend of £600k in 2023/24.

---

**3) Decarbonisation / Solar PV**

---

A 5 year programme has been included at £400k p.a.

---

---

**4) Renewal of Roofing at Eringden**

A new capital submission had been prepared for spend of £220k in 2023/24.

---

**5) Renewal of Windows at Eringden**

A new capital submission had been prepared for spend of £180k in 2023/24.

---

**6) Internal flooring and decoration at Eringden**

A new capital submission had been prepared for spend of £90k in 2024/25.

---

---

---

---

---

**CAPITAL STRATEGY ACTION PLAN****ANNEX B**

<b>REF</b>	<b>ACTION</b>	<b>RESPONSIBILITY</b>	<b>TIMESCALE</b>
1	The capital appraisal process and associated documentation to be reviewed and updated where appropriate to ensure proper consideration is given to whole life costs of schemes; alternative options; risk management, etc, and to address the concerns outlined on completion of the CIPFA Property Capital Strategy Self-Assessment Checklist.	J Goodfellow	March 23
2	Following receipt of the updated Asset Management Strategy, an Asset Management Plan for each property should be developed, including an asset viability model, identifying demand, costs and income generated for each group of assets. The Asset Strategy Steering Group should receive the results of the viability modelling, and regular reports monitoring the performance of commercial property in order to identify poorly performing and well performing assets, and as a result develop a plan for future maintenance and investment, and options appraisal/disposals plans as appropriate.	P Weston/J Goodfellow/Asset Strategy Steering Group	Commenced October 2019 – to be completed June 23
3	Risk register around corporate asset management to be developed	P Weston	Completed
4	A planned approach to be established for the use of the Building Repairs Fund for both planned maintenance & responsive repairs & Building Condition Standards	P Weston/ J Goodfellow	Commence October 2019 – ongoing June 2023
